

# Monthly Report | Dec-2024

# **Fund Manager Comment**

In Dec 2024, the CSE experienced a historic performance, with the ASPI increasing by 20.89% while the S&P SL20 Index witnessing an even stronger 24.50% MoM gain. The Fund's benchmark, ASTRI, posted a MoM increase of 20.99%, while the Fund itself recorded a growth of 15.26%. This remarkable performance was driven by positive political environment, robust earnings reported by listed corporates and improvements in macroeconomic front including 5.5% Real GDP Growth reported for 3Q2024. SL credit rating received a significant boost subsequent to positive developments in external debt restructuring, with the country being upgraded from Restricted Default (RD) to CCC+ by Fitch. Following that, Moody's too upgraded SL credit rating to Caa1. The market's average daily turnover increased substantially from LKR 3.7 Bn in Nov 2024 to LKR 6.3 bn in Dec 2024, marking the highest monthly market activity for CY2024. However, despite this strong performance, foreign activity registered a net outflow of LKR 0.6 Bn during the month. With strengthened macroeconomic fundamentals, low interest rate environment, stable political environment, strong investor sentiment, and continued structural reforms, we continue to remain bullish on the equity market in the medium term, though a market correction might take place in the short run. \*Source: SFAM and CSE
